

Industrial Mechanical Technician Internship

Join Daphne Technology to be part of our exciting journey to bring pioneering exhaust gas cleaning systems to the market. Daphne leverages innovative technology to remove exhaust gas toxic pollutants and GHG emissions. Work with talented individuals and enjoy a decentralised decision-making structure that empowers everyone to take an active role in shaping the business. Daphne Technology is one of Europe's most innovative climate tech companies. We are now scaling up to drive global growth.

As an **Industrial Mechanical Technician**, you will have the unique opportunity to help the mechanical engineering department to bring ideas into reality. Part of an innovative department, you will actively contribute to the development of new technologies, from the early stage of a concept or prototype into products.

Responsibilities

Contribute to the mechanical engineering department:

- Create detailed 3D designs from engineering concepts for manufacturing
- Precisely write industry standard technical drawings for manufacturing (complete production detail drawings)
- Review drawings for correctness and conformance to industry standards and company design philosophy (determine scaling, inserts necessary reference datums, centre and dimension lines, hidden line interpolations, and sectioning)
- Illustrate assembly drawings and diagrams of Daphne Technology's systems for documentation
- Completes details of major layout drawings prepared by others in accordance with standard engineering drafting practices using computer aided design systems

Qualifications

- Swiss CFC for "[Dessinateur/trice constructeur/trice industriel](#)" or equivalent

What we are looking for

- Software skills: Autodesk Inventor, AutoCAD, Autodesk Vault → Design, Modelling and Drafting for Manufacturing (SolidWorks, CATIA, PTC Creo also accepted)
- Knowledge and experience working Geometric Dimensioning and Tolerancing (GD&T), Tolerance Stack up Calculation
- An enthusiastic and proactive team member
- Structured and methodical mindset

- Material science and industrial manufacturing methods basic knowledge
- Good communication skills in English and French
- Passionate commitment to a sustainable future

Star Points

- Familiarity and knowledge of engineering materials used in the process industry

What we bring to the table

- An inclusive and engaging work environment
- An international, diverse, and multi-disciplinary team
- A focus on soft skills like collaboration and teamwork
- A focus on empowering our people and enabling them to lead and contribute to their fullest potential
- A pioneering technology with an enormous potential
